HIGH-PRECISION  
HISTOPATHOLOGY

### Description of services

This facility offers standard histology lab services plus custom Laser Capture Microdissection.

Applications:

- Diagnostics/screening (toxicity, mode of action) on the tissue level
- Understanding of physiological and physiopathological mechanisms
- Drug target discovery
- Analysis of bioactive molecules
- Pharmacology, toxicology, pathology
- Tissue genomics

### Keywords

Laser Capture Microdissection, Tissue Micro Arrays, pharmacotoxicology, immunohistochemistry, nucleic acid extraction and amplification
